

2Q FY 2025 Earnings Supplemental Slides

Safe harbor

Statements we make in this presentation may include statements which are not historical facts and are considered forward-looking within the meaning of the Private Securities Litigation Reform Act of 1995, which are usually identified by the use of words such as "anticipates," "believes," "estimates," "expects," "intends," "may," "plans," "possible," "projects," "outlook," "seeks," "should," "will," and variations of such words or similar expressions, including the negatives of these words or similar expressions.

We intend these forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, and are making this statement for purposes of complying with those safe harbor provisions.

.

These forward-looking statements include, but are not limited to, statements regarding our guidance for the third fiscal quarter and full fiscal year 2025, our business strategy, plans and objectives of management for future operations, our future growth, the estimated addressable market opportunity for our platform and statements regarding the growth of the enterprise automation market, the success of our platform and new releases including the incorporation of AI, the success of our collaborations with third parties, our customers' behaviors and potential automation spend, and details of UiPath's stock repurchase program. Forward-looking statements involve known and unknown risks, uncertainties, and other factors that may cause our actual results, performance, or achievements to be materially different from any future growth, but are not limited to, risks and uncertainties related to: our expectations regarding our revenue, annualized renewal run-rate (ARR), expenses, and other operating results; our ability to effectively manage our growth and achieve or sustain profitability; our ability to acquire new customers and successfully retain existing customers; the ability of the UiPath Business Automation Platform to satisfy and adapt to customer demands and our ability to evolve and enhance our brand; our growth strategies; the estimated addressable market opportunity for our platform and for automation in general; our reliance on key personnel and our ability to attract, integrate, and retain highly-qualified personnel and execute management transitions, including our CEO transition; our ability to octs and success of lour collaborations with material component impacts, including but not limited to military conflicts and other changes in geopolitical relationships and inflationary cost trends, on our obsiness statements in our business. Automation in general; our reliance on third-party providers of cloud-based infrastructure; our ability to compete effectively with existing competitors and new market entrants

Further information on risks that could cause actual results to differ materially from our guidance and other forward-looking statements can be found in our Annual Report on Form 10-K for the fiscal year January 31, 2024 filed with the SEC on March 27, 2024, in our Quarterly Reports on Form 10-Q filed with the SEC, and in other filings and reports that we may file from time to time with the SEC. Any forward-looking statements contained in this presentation are based on assumptions that we believe to be reasonable as of this date. Except as required by law, we assume no obligation to update these forward-looking statements.

Our fiscal year end is January 31, and our fiscal quarters end on April 30, July 31, and October 31. All third-party trademarks, including names, logos and brands, referenced by us in this presentation are property of their respective owners. All references to third-party trademarks are for identification purposes only. Such use should not be construed as an endorsement of the products or services of us. During the earnings call, we will share a UiPath product demo. UiPath products and services are not a substitute for medical advice and treatment from qualified medical professionals.

Non-GAAP financial measures and key performance metric

UiPath uses certain non-GAAP financial measures in this presentation, including non-GAAP gross margin, non-GAAP operating expenses, non-GAAP operating income and margin and non-GAAP adjusted free cash flow. Non-GAAP financial measures are financial measures that are derived from the consolidated financial statements, but that are not presented in accordance with generally accepted accounting principles in the United States, or GAAP. We believe they are useful to investors, by excluding the effects of special items that do not reflect the ordinary earnings of our operations, and as a supplement to GAAP measures. Investors should consider these non-GAAP financial measures in addition to, and not as a substitute for, our financial performance measures prepared in accordance with GAAP. Further, our non-GAAP information may be different from the non-GAAP information provided by other companies. Please refer to the Appendix and to the tables in our earnings release and the Investors section of our website for a reconciliation of these non-GAAP financial measures to the most directly comparable GAAP measures. Reconciliation of non-GAAP operating income guidance to the most directly comparable GAAP measures in advailable without unreasonable efforts on a forward-looking basis due to the high variability, complexity and low visibility with respect to the charges excluded from this non-GAAP measure, including, in particular, the effects of stock-based compensation expense specific to equity awards that are directly impacted by fluctuations in our stock price. We expect the variability of show as a singlificant, and potentially unpredictable, impact on our future GAAP measures to consider our GAAP results and non-GAAP measures, and to review the reconciliation between GAAP measures that is included at the end of this presentation.

Annualized Renewal Run-rate (ARR) is the key performance metric we use in managing our business because it illustrates our ability to acquire new subscription customers and to maintain and expand our relationships with existing subscription customers. We define ARR as annualized invoiced amounts per solution SKU from subscription licenses and maintenance and support obligations assuming no increases or reductions in customers' subscriptions. ARR does not include the costs we may incur to obtain such subscription licenses or provide such maintenance and support, and does not reflect any actual or anticipated reductions in invoiced value due to contract non-renewals or service cancellations other than for certain reserves, for example those for credit losses or disputed amounts. ARR does not include invoiced amounts associated with perpetual licenses or professional services. ARR is not a forecast of future revenue, which is impacted by contract start and end dates and duration. ARR should be viewed independently of revenue and deferred revenue as ARR is an operating metric and is not intended to replace these items. Dollar-based net retention rate represents the rate of net expansion of our ARR from existing customers over the preceding 12 months. We calculate dollar-based net retention rate as of a period end by starting with ARR from these same customers as of 12 months prior to such period ARR). We then calculate the ARR from these same customers as of the current period ARR). Current Period ARR). Current Period ARR is net of any contraction or attrition over the preceding 12 months but does not include any expansion and is net of any contraction or attrition over the preceding 12 months current period ARR is not actual performance. Investors should not place undue reliance on ARR to arrive at dollar-based net retention rate. Dollar-based net retention rate may fluctuate based on the customers that qualify to be included in the cohort used for calculation and may not reflect our actual performance. Investors

Definitions and calculations

Ui Path[®]

Annualized Renewal Run-rate (ARR): Annualized Renewal Run-rate (ARR) is the key performance metric we use in managing our business because it illustrates our ability to acquire new subscription customers and to maintain and expand our relationships with existing subscription customers. We define ARR as annualized invoiced amounts per solution SKU from subscription licenses and maintenance and support obligations assuming no increases or reductions in customers' subscriptions. ARR does not include the costs we may incur to obtain such subscription licenses or provide such maintenance and support, and does not reflect any actual or anticipated reductions in invoiced value due to contract non-renewals or service cancellations other than for certain reserves, for example those for credit losses or disputed amounts. ARR does not include invoiced amounts associated with perpetual licenses or professional services. ARR is not a forecast of future revenue, which is impacted by contract start and end dates and duration. ARR should be viewed independently of revenue and deferred revenue as ARR is an operating metric and is not intended to replace these items.

Dollar-Based Net Retention Rate: Dollar-based net retention rate represents the rate of net expansion of our ARR from existing customers over the preceding 12 months. We calculate dollar-based net retention rate as of a period end by starting with ARR from the cohort of all customers as of 12 months prior to such period end (Prior Period ARR). We then calculate the ARR from these same customers as of the current period end (Current Period ARR). Current Period ARR includes any expansion and is net of any contraction or attrition over the preceding 12 months but does not include ARR from new customers in the current period. We then divide total Current Period ARR by total Prior Period ARR to arrive at dollar-based net retention rate. Dollar-based net retention rate may fluctuate based on the customers that qualify to be included in the cohort used for calculation and may not reflect our actual performance.
